**Full-Stack WordPress Developer** with 5 years of experience specializing in custom theme development and block editor customization. Skilled in both front-end and back-end work, delivering responsive, scalable websites that match client needs. Committed to clean code, performance optimization, and modern web best practices.

**Skills & Technologies:** WordPress (Core, Custom Theme Development, Gutenberg Customization, ACF, REST API, Multi-Site, Multi-Language), Custom Post Types & Taxonomies, Gutenberg Custom Blocks, HTML, CSS (SCSS/Sass, Flexbox, CSS Grid, Bootstrap), JavaScript (ES6+), PHP, Responsive Design, Cross-Browser QA, Web Accessibility (WCAG 2.1+), Performance Optimization (lazy loading, minification, render-blocking fixes), Git/GitHub Workflows, Third-Party Integrations (e.g. CRMs, APIs), Figma, Adobe Creative Suite, AI tools (copilot in VS Code, chatGPT), Prompt Engineering Skills

## Professional Experience

**Relish New Brand Experience**, Winnipeg, MB, Canada  
**Web Developer**

November 2022 – Present

Building multi page websites with complex logical structure and fully customizable :

- **Developed** custom WordPress themes from scratch, translating client-approved UI/UX designs into responsive, cross-browser compatible websites.
- **Customized WordPress themes** on both the **front end and back end** by adapting templates, PHP, and JavaScript to implement pixel-perfect designs, required functionality, and well-structured content architecture using custom post types, taxonomies, and WordPress template hierarchy.
- **Implemented** scalable CSS architectures using standard CSS, Flexbox, and SCSS with custom mixins to ensure precise design implementation and enable rapid design iteration.
- **Built** custom Gutenberg blocks using ACF plugin to deliver unique, scalable functionality tailored to client needs.
- **Collaborated** with project managers, designers, and developers to deliver user-friendly, high-performance websites aligned with best practices.
- **Optimized** and maintained existing sites through debugging, updates, performance improvements, and feature enhancements.
- **Set up** and managed hosting environments (databases, servers, WordPress CLI) and deployed WordPress systems using Docker to ensure consistent and reproducible development and production workflows.
- **Provided** technical support to clients, ensuring smooth site performance and ongoing functionality.
- **Prompt Engineering:** Skilled at crafting precise and structured prompts to generate high-quality outputs from AI tools (e.g., ChatGPT, Copilot), improving development workflows, content generation, and debugging efficiency.
- **Project Management:** Agile, Scrum, Kanban (using Trello)

My duties :

- Developed custom WordPress themes, landing pages, and WooCommerce sites based on client-approved designs, ensuring responsive and conversion-focused results.
- Utilized Elementor and WPBakery page builders to efficiently implement designs while maintaining flexibility for future edits.
- Collaborated with designers and clients to deliver user-friendly, visually consistent websites that met business objectives.
- Provided ongoing web support, troubleshooting, and maintenance to ensure optimal site performance.

## **Education**

Bachelor, Computer Science | University of Information Technology and Management, Poland (2020)
